Cautionary Note – The SEC permits oil and gas companies, in their filings with the SEC, to disclose only proved, probable and possible reserves. Potential resources are not proved, probable or possible reserves. The SEC's guidelines prohibit Matador from including such information in filings with the SEC.

Definitions – Proved oil and natural gas reserves are the estimated quantities of oil and natural gas that geological and engineering data demonstrate with reasonable certainty to be recoverable in future years from known reservoirs under existing economic and operating conditions. Matador's production and proved reserves are reported in two streams: oil and natural gas, including both dry and liquids-rich natural gas. Where Matador produces liquids-rich natural gas, the economic value of the natural gas liquids associated with the natural gas is included in the estimated wellhead natural gas price on those properties where the natural gas liquids are extracted and sold. Estimated ultimate recovery (EUR) is a measure that by its nature is more speculative than estimates of proved reserves prepared in accordance with SEC definitions and guidelines and is accordingly less certain. Type curves, if any, shown in this presentation are used to compare actual well performance to a range of potential production results calculated without regard to economic conditions; actual recoveries may vary from these type curves based on individual well performance and economic conditions.

Safe Harbor Statement – This presentation and statements made by representatives of Matador Resources Company ("Matador" or the "Company") during the course of this presentation includes "forward-looking statements" within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended. "Forward-looking statements" are statements related to future, not past, events. Forward-looking statements are based on current expectations and include any statement that does not directly relate to a current or historical fact. In this context, forward-looking statements often address expected future business and financial performance, and often contain words such as "could," "believe," "would," "anticipate," "intend," "estimate," "expect," "may," "should," "continue," "plan," "predict," "potential," "project," "hypothetical," "forecasted" and similar expressions that are intended to identify forward-looking statements, although not all forward-looking statements contain such identifying words. Such forward-looking statements include, but are not limited to, statements about the anticipated benefits, opportunities and results with respect to the Advance (as defined herein) acquisition, including any expected value creation, reserves additions, midstream opportunities and other anticipated impacts from the Advance acquisition, as well as other aspects of the transaction, guidance, projected or forecasted financial and operating results, future liquidity, leverage, the payment of dividends, results in certain basins, objectives, project timing, expectations and intentions, regulatory and governmental actions and other statements that are not historical facts. Actual results and future events could differ materially from those anticipated in such statements, and such forward-looking statements may not prove to be accurate. These forward-looking statements involve certain risks and uncertainties, including, but not limited to, disruption from the Advance acquisition making it more difficult to maintain business and operational relationships; significant transaction costs associated with the Advance acquisition; the risk of litigation and/or regulatory actions related to the Advance acquisition, as well as the following risks related to financial and operational performance: general economic conditions; the Company's ability to execute its business plan, including whether its drilling program is successful; changes in oil, natural gas and natural gas liquids prices and the demand for oil, natural gas and natural gas liquids; its ability to replace reserves and efficiently develop current reserves; the operating results of the Company's midstream oil, natural gas and water gathering and transportation systems, pipelines and facilities, the acquiring of third-party business and the drilling of any additional salt water disposal wells; costs of operations; delays and other difficulties related to producing oil, natural gas and natural gas liquids; delays and other difficulties related to regulatory and governmental approvals and restrictions; impact on the Company's operations due to seismic events; its ability to make acquisitions on economically acceptable terms; its ability to integrate acquisitions; availability of sufficient capital to execute its business plan, including from future cash flows, available borrowing capacity under its revolving credit facilities and otherwise; the operating results of and the availability of any potential distributions from our joint ventures; weather and environmental conditions; the ongoing impact of the novel coronavirus, or COVID-19, or variants thereof, on oil and natural gas demand, oil and natural gas prices and its business; and the other factors that could cause actual results to differ materially from those anticipated or implied in the forward-looking statements. For further discussions of risks and uncertainties, you should refer to Matador's filings with the Securities and Exchange Commission ("SEC"), including the "Risk Factors" section of Matador's most recent Annual Report on Form 10-K and any subsequent Quarterly Reports on Form 10-Q. Matador undertakes no obligation to update these forward-looking statements to reflect events or circumstances occurring after the date of this annual report, except as required by law, including the securities laws of the United States and the rules and regulations of the SEC. You are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date of this presentation. All forward-looking statements are qualified in their entirety by this cautionary statement.

PTTP + LOE + G&A	$14.43	$13.66	$13.90 to $15.80	$13.00 to $14.50 ↓

1 PTTP range reflects sequential increases in expected production taxes in Q4 due to expected increase in realized commodity prices

- *2023E transportation and processing expenses expected to be $1.25 to $1.75 per BOE*

2 LOE range reflects increased costs associated with operating in Lea County, NM, especially after April 2023 closing of Advance acq.

- *Offset expense increases by targeting improvements in workover, supervision and repair and maintenance costs*

3 POMS expected to stay relatively flat in Q4 2023, as compared to Q3 2023

- *Q1 2023 included non-recurring, one-time repair and maintenance costs associated with Pronto system → expect decrease on a per unit basis in Q2-Q4 2023E*

4 DD&A range reflects anticipated increase in drilling and completion costs and Advance acquisition in 2023

5 G&A range reflects anticipated increase in expense proportionate to anticipated increases in production and activity

- *Q3 2023 G&A expense reflected employee stock awards that are settled in cash, the values of which are remeasured at each reporting period; these cash-settled stock award amounts increased due to Matador's share price increasing 14% from $52.32 at June 30, 2023 to $59.48 at the end of September 2023*

(1) Total does not include the impact of purchased natural gas or immaterial accretion expense.

Q3 2023 & Q4 2023E Commodity Price Differentials

Realized Commodity Prices	Q3 2023 Benchmark[1]	Q3 2023 Actual Realized Price	Q3 2023 Actual Differential	Q4 2023E Differential Guidance[2]
Oil Prices, per Bbl	$82.22	$82.49	+$0.27	-$0.25 to +$0.75 (Above Benchmark)
Natural Gas Prices, per Mcf	$2.66	$3.56	+$0.90	$0.00 to +$1.00 (Above Benchmark)

- **The realized oil price differential of +$0.27 per Bbl (above the benchmark) in Q3 2023 is expected to stay relatively flat in Q4 2023 at approximately +$0.25 per Bbl (above the benchmark) in Q4 2023.**

- **The change in the realized natural gas price differential from +$0.90 per Mcf (above the benchmark) in Q3 2023 to approximately +$0.50 per Mcf (above the benchmark) in Q4 2023 is primarily attributable to an expected widening of natural gas basis differentials, including at the Waha hub, in Q4 2023, as compared to Q3 2023.**
  - *Matador is a two-stream reporter, and the revenues associated with its NGL production are included in the weighted average realized natural gas price. NGL prices do not contribute to or affect Matador's realized gain or loss on natural gas derivatives.*

(1) Oil benchmark is WTI and natural gas benchmark is Henry Hub daily average.

(1) These sustainability metrics have been calculated using the best information available to us at the time of publication. The data utilized in calculating such metrics is subject to certain reporting rules, regulatory reviews, definitions, calculation methodologies, estimates, adjustments and other factors. As a result, these metrics are subject to change from time to time as updated data or other information becomes available. The metrics provided reflect both Matador's gross operated exploration & production operations and gross operated midstream operations on a consolidated basis, except where otherwise noted.
(2) Emissions and flared volumes are calculated in accordance with Environmental Protection Agency standards and reflect only Matador's gross operated exploration & production volumes.
(3) Fresh water is defined as <1,000 mg/L total dissolved solids and includes Matador's gross operated volumes for hydraulic fracturing and completions operations, as well as estimates for Matador's other operations.
(4) As some portion of the total fluid used for hydraulic fracturing operations.

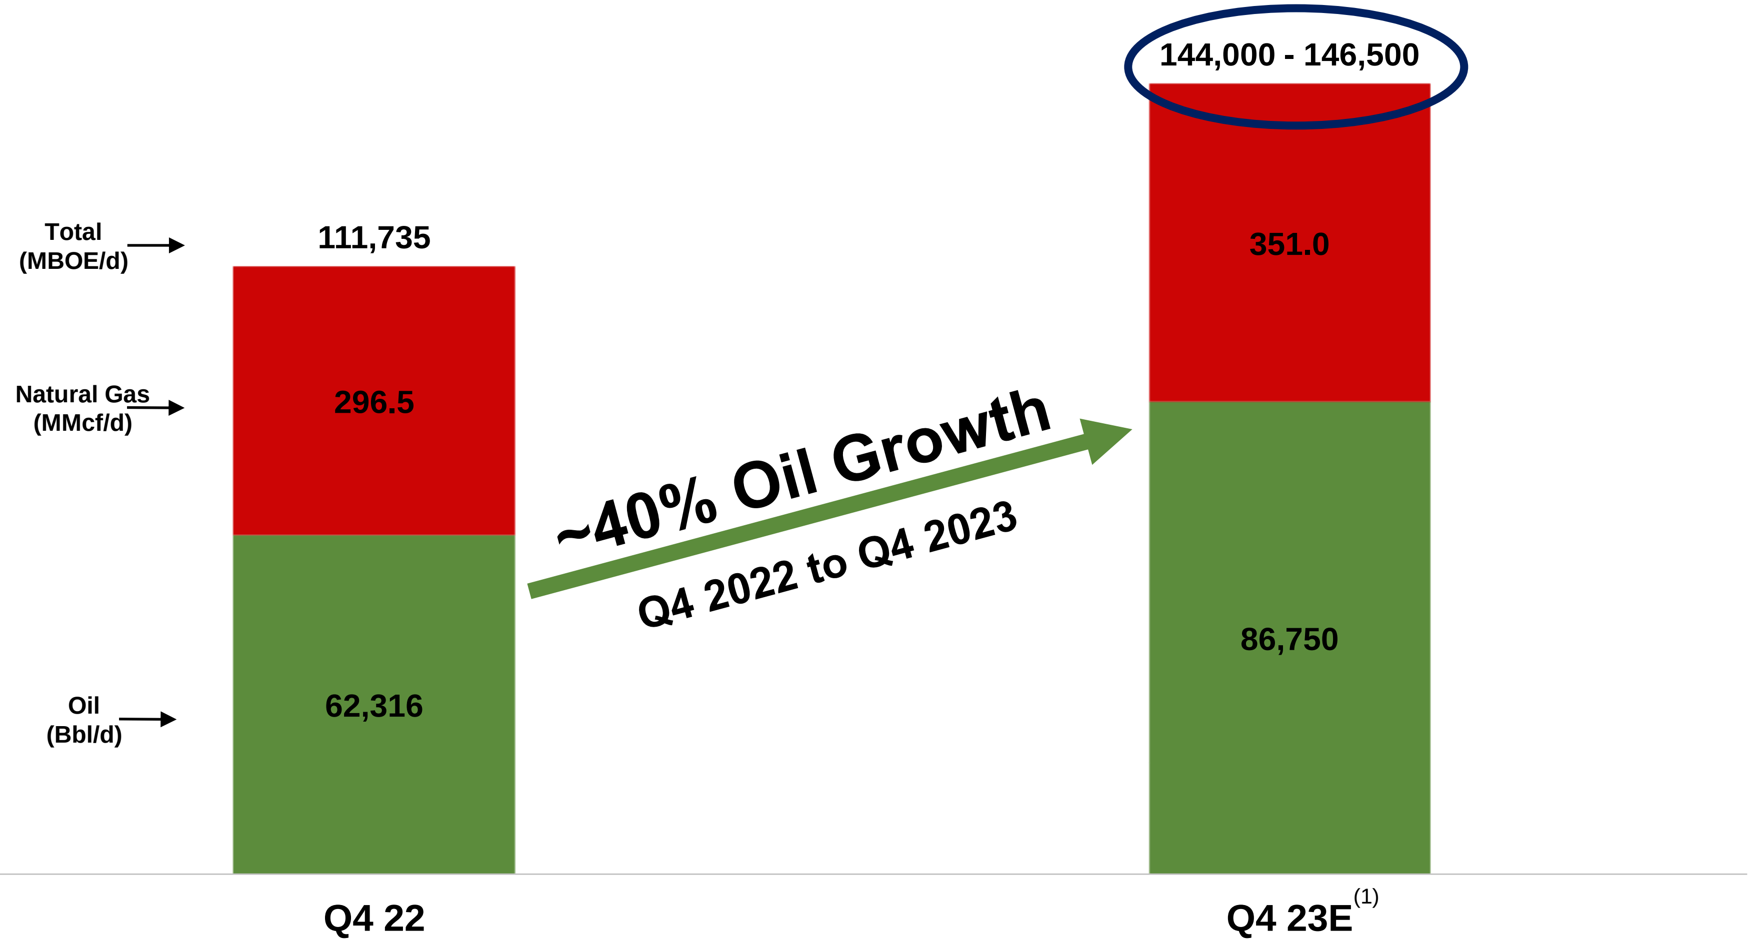
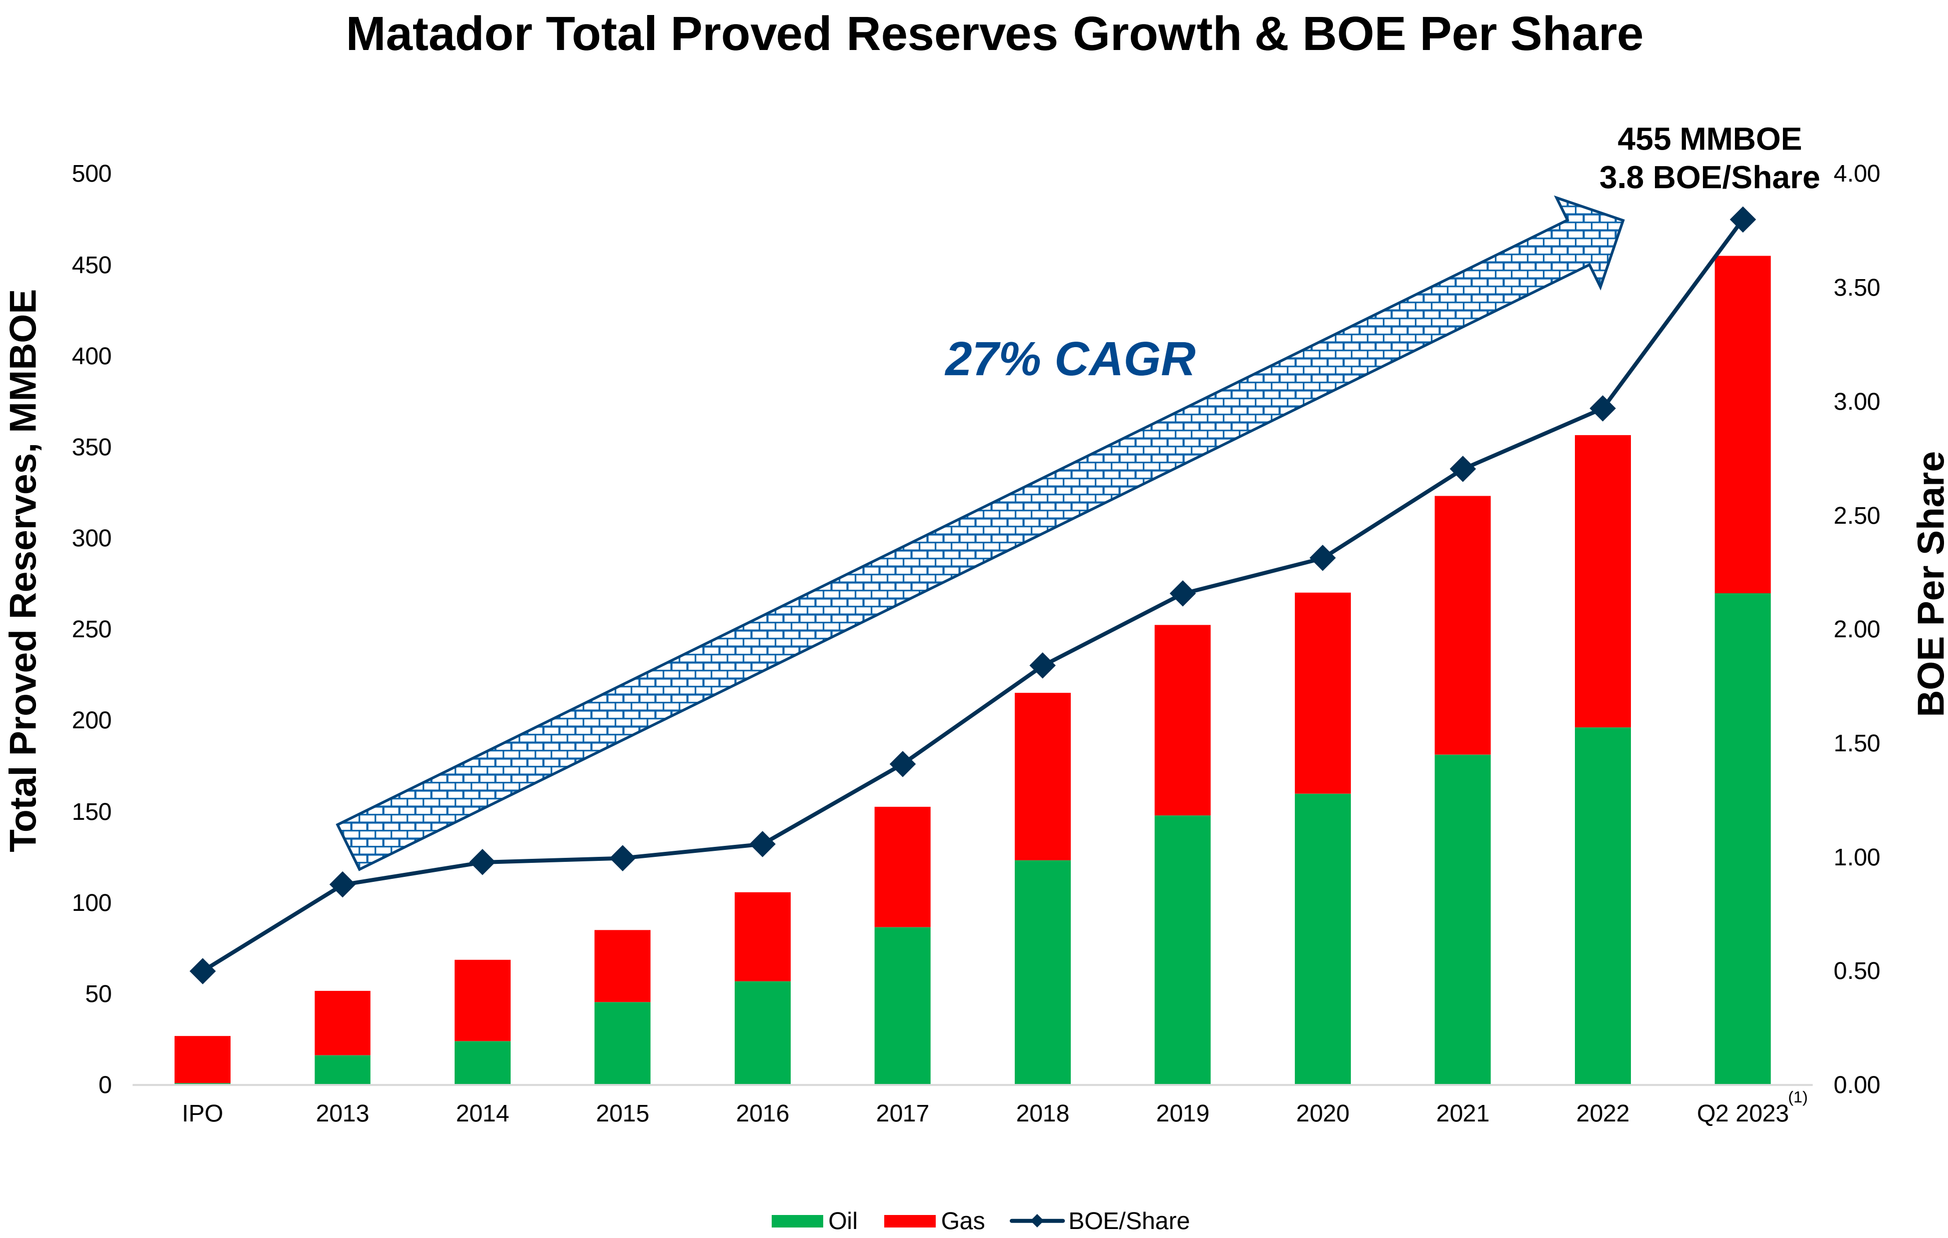
Steady Oil Production Growth

Approaching 150,000 BOE/d!



(1) As of and as provided on October 24, 2023.

Steady Growth, Measured Pace

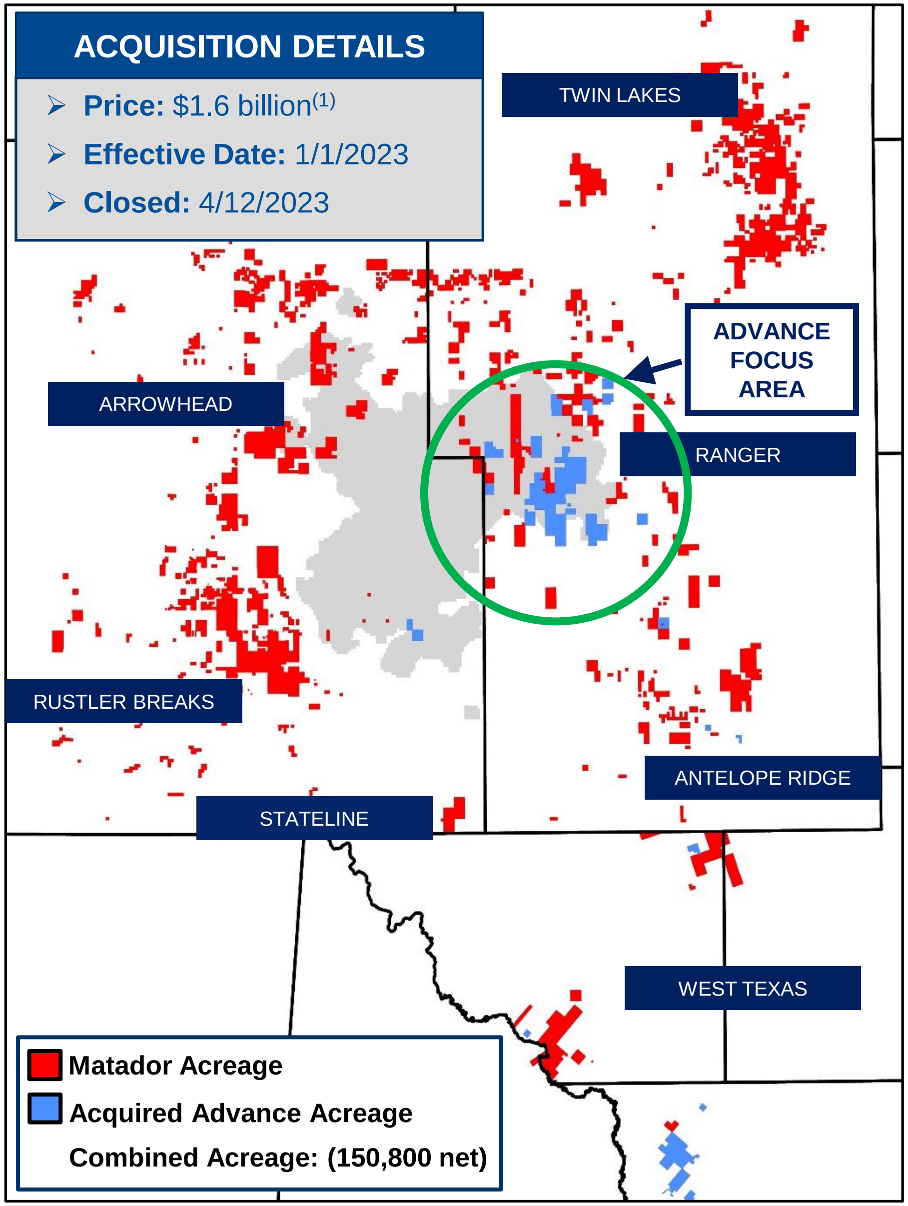


(1) The reserves estimates were prepared by the Company's internal engineering staff. These reserves estimates at all dates were prepared in accordance with the SEC's rules for oil and natural gas reserves reporting and do not include any unproved reserves classified as probable or possible that might exist on Matador's properties.

Matador's Strategic Bolt-On Acquisition of Advance Energy

ACQUISITION DETAILS

- **Price:** $1.6 billion[1]
- **Effective Date:** 1/1/2023
- **Closed:** 4/12/2023



Note: All acreage as of June 30, 2023. Some tracts not shown on map.

Advance Acquisition Highlights

- Strategic bolt-on in the core of the Northern Delaware Basin
  - 18,500 net acres → 99% Held-by-Production
- Attractive purchase price
- Accretive to relevant key financial and valuation metrics
- Strong existing production, cash flow and proved reserves
- Adds high-quality inventory in primary development zones
  - 203 net locations primarily in the Avalon, Bone Spring, and Wolfcamp; includes 21 gross (20 net) DUCs
- Upside midstream value and synergies with Pronto Midstream
- Matador preserves strong balance sheet

Key Metrics

Net Acres	18,500
Held by Production (%)	99%
Net Locations	203 (85% operated)
Avg. Operated Lateral Length	9,400 feet
YE 2022 Proved Reserves	106 MMBOE (73% oil)
YE 2022 PV-10[2]	$2.86 billion

(1) Subject to customary closing adjustments and plus additional cash consideration of $7.5 million for each month during 2023 in which the average oil price as defined in the securities purchase agreement exceeds $85 per Bbl.
(2) PV-10 is a non-GAAP financial measure, which differs from the GAAP financial measure of "Standardized Measure" because PV-10 does not include the effects of income taxes on future income. The income taxes related to the Advance assets is unknown at this time because the Company's tax basis in such properties is not known and is subject to many variables. As such, the Company has not provided the Standardized Measure of the acquired properties or a reconciliation of PV-10 to Standardized Measure.

Note: Oil and natural gas prices noted are in $/Bbl and $/MMBtu, respectively. Prices reflect the arithmetic average of first-day-of-month oil and natural gas prices for the periods January 1 to December 31, 2022, as per SEC guidelines for reserves estimation. The reserves estimates at all dates presented above were prepared by the Company's internal engineering staff and were also audited by an independent reservoir engineering firm, Netherland, Sewell & Associates, Inc. These reserves estimates at all dates were prepared in accordance with the SEC's rules for oil and natural gas reserves reporting and do not include any unproved reserves classified as probable or possible that might exist on Matador's properties.

Delaware Basin Extended Lateral Well Location Inventory

- Matador has identified up to **4,382 gross (1,468 net)** remaining potential locations as of December 31, 2022, for future drilling in the Delaware Basin
  - *Location counts assume extended lateral lengths whenever viable, and the total locations have an average lateral length of ~9,000'*
  - *Almost all intervals assume 160-acre well spacing (none less than 100-acre spacing at same true vertical depth)*
- Matador anticipates operating up to 2,198 gross (1,296 net) of these potential locations[(2)]
- **Matador closed the Advance acquisition in April 2023, adding an incremental 203 net locations[(3)] in primary development zones (Avalon, Bone Spring and Wolfcamp)**

Adjusted EBITDA & Adjusted Free Cash Flow Reconciliations

Adjusted EBITDA Reconciliation – This presentation includes the non-GAAP financial measure of Adjusted EBITDA. Adjusted EBITDA is a supplemental non-GAAP financial measure that is used by management and external users of the Company's consolidated financial statements, such as securities analysts, investors, lenders and rating agencies. "GAAP" means Generally Accepted Accounting Principles in the United States of America. The Company believes Adjusted EBITDA helps it evaluate its operating performance and compare its results of operations from period to period without regard to its financing methods or capital structure. The Company defines, on a consolidated basis and for San Mateo, Adjusted EBITDA as earnings before interest expense, income taxes, depletion, depreciation and amortization, accretion of asset retirement obligations, property impairments, unrealized derivative gains and losses, non-recurring transaction costs for certain acquisitions, certain other non-cash items and non-cash stock-based compensation expense and net gain or loss on asset sales and impairment. Adjusted EBITDA for San Mateo includes the combined financial results of San Mateo Midstream, LLC and San Mateo Midstream II, LLC prior to their October 2020 merger. Adjusted EBITDA is not a measure of net income (loss) or net cash provided by operating activities as determined by GAAP. All references to Matador's Adjusted EBITDA are those values attributable to Matador Resources Company shareholders after giving effect to Adjusted EBITDA attributable to third-party non-controlling interests, including in San Mateo. Adjusted EBITDA should not be considered an alternative to, or more meaningful than, net income (loss) or net cash provided by operating activities as determined in accordance with GAAP or as an indicator of the Company's operating performance or liquidity. Certain items excluded from Adjusted EBITDA are significant components of understanding and assessing a company's financial performance, such as a company's cost of capital and tax structure. Adjusted EBITDA may not be comparable to similarly titled measures of another company because all companies may not calculate Adjusted EBITDA in the same manner. This Appendix presents the calculation of Adjusted EBITDA and the reconciliation of Adjusted EBITDA to the GAAP financial measures of net income (loss) and net cash provided by operating activities, respectively, that are of a historical nature. Where references are pro forma, forward-looking, preliminary or prospective in nature, and not based on historical fact, the table does not provide a reconciliation. The Company could not provide such reconciliation without undue hardship because such Adjusted EBITDA numbers are estimations, approximations and/or ranges. In addition, it would be difficult for the Company to present a detailed reconciliation on account of many unknown variables for the reconciling items, including future income taxes, full-cost ceiling impairments, unrealized gains or losses on derivatives and gains or losses on asset sales and impairment. For the same reasons, the Company is unable to address the probable significance of the unavailable information, which could be material to future results.

Adjusted Free Cash Flow Reconciliation – This presentation includes the non-GAAP financial measure of adjusted free cash flow. This non-GAAP item is measured, on a consolidated basis for the Company and for San Mateo, as net cash provided by operating activities, adjusted for changes in working capital and cash performance incentives that are not included as operating cash flows, less cash flows used for capital expenditures, adjusted for changes in capital accruals. On a consolidated basis, these numbers are also adjusted for the cash flows related to non-controlling interest in subsidiaries that represent cash flows not attributable to Matador shareholders. Adjusted free cash flow should not be considered an alternative to, or more meaningful than, net cash provided by operating activities as determined in accordance with GAAP or as an indicator of the Company's liquidity. Adjusted free cash flow is used by the Company, securities analysts and investors as an indicator of the Company's ability to manage its operating cash flow, internally fund its D/C/E capital expenditures, pay dividends and service or incur additional debt, without regard to the timing of settlement of either operating assets and liabilities or accounts payable related to capital expenditures. Additionally, this non-GAAP financial measure may be different than similar measures used by other companies. The Company believes the presentation of adjusted free cash flow provides useful information to investors, as it provides them an additional relevant comparison of the Company's performance, sources and uses of capital associated with its operations across periods and to the performance of the Company's peers. In addition, this non-GAAP financial measure reflects adjustments for items of cash flows that are often excluded by securities analysts and other users of the Company's financial statements in evaluating the Company's cash spend. This Appendix reconciles adjusted free cash flow to its most directly comparable GAAP measure of net cash provided by operating activities. All references to Matador's adjusted free cash flow are those values attributable to Matador shareholders after giving effect to adjusted free cash flow attributable to third-party non-controlling interests, including in San Mateo. Adjusted free cash flow for San Mateo includes the combined financial results of San Mateo Midstream, LLC and San Mateo Midstream II, LLC prior to their October 2020 merger. Where references are pro forma, forward-looking, preliminary or prospective in nature, and not based on historical fact, the table does not provide a reconciliation. The Company could not provide such reconciliation without undue hardship because such adjusted free cash flow numbers are estimations, approximations and/or ranges. In addition, it would be difficult for the Company to present a detailed reconciliation on account of many unknown variables for the reconciling items, including changes in working capital, future operating activities and liabilities and future capital expenditures. For the same reasons, the Company is unable to address the probable significance of the unavailable information, which could be material to future results.

Adjusted Net Income and Adjusted Earnings Per Diluted Common Share

This presentation includes the non-GAAP financial measures of adjusted net income and adjusted earnings per diluted common share. These non-GAAP items are measured as net income attributable to Matador Resources Company shareholders, adjusted for dollar and per share impact of certain items, including unrealized gains or losses on derivatives, the impact of full cost-ceiling impairment charges, if any, and non-recurring transaction costs for certain acquisitions or other non-recurring income or expense items, along with the related tax effect for all periods. This non-GAAP financial information is provided as additional information for investors and is not in accordance with, or an alternative to, GAAP financial measures. Additionally, these non-GAAP financial measures may be different than similar measures used by other companies. The Company believes the presentation of adjusted net income and adjusted earnings per diluted common share provides useful information to investors, as it provides them an additional relevant comparison of the Company's performance across periods and to the performance of the Company's peers. In addition, these non-GAAP financial measures reflect adjustments for items of income and expense that are often excluded by industry analysts and other users of the Company's financial statements in evaluating the Company's performance. The table below reconciles adjusted net income and adjusted earnings per diluted common share to their most directly comparable GAAP measure of net income attributable to Matador Resources Company shareholders.

PV-10 Reconciliation - Matador

PV-10 is a non-GAAP financial measure and generally differs from Standardized Measure, the most directly comparable GAAP financial measure, because it does not include the effects of income taxes on future income. PV-10 is not an estimate of the fair market value of the Company's properties. Matador and others in the industry use PV-10 as a measure to compare the relative size and value of proved reserves held by companies and of the potential return on investment related to the companies' properties without regard to the specific tax characteristics of such entities. PV-10 may be reconciled to the Standardized Measure of discounted future net cash flows at such dates by adding the discounted future income taxes associated with such reserves to the Standardized Measure. Income taxes related to the Advance assets as of December 31, 2022 were unknown because the tax basis in such properties as of December 31, 2022 is not known and is subject to many variables. As such, the Company has not provided the Standardized Measure of the Advance assets or a reconciliation of PV-10 to Standardized Measure with respect to the Advance assets.
